

# Aliens

**Quotations** "I don't like alien films where you don't get to see the aliens."

- Peter Borg

"Is E.T. out there? Well, I work at the SETI Institute. That's almost my name. SETI: Search for Extraterrestrial Intelligence. In other words, I look for aliens, and when I tell people that at a cocktail party, they usually look at me with a mildly incredulous look on their face. I try to keep my own face somewhat dispassionate."

- Seth Shostak

## Questions

- Do you believe in aliens or life in the universe?
- What might aliens look like?
- Do you think aliens have ever visited earth?
- What does the acronym UFO mean?
- Have you seen a UFO or do you know someone who has seen a UFO?
- What is your favourite alien from a film?
- What is the scariest alien film?
- If aliens did come to a country and met with the government of that country, what do you think would happen?
- Why are humans so fascinated by aliens?
- How many planets do you think are in our galaxy? How about the universe?
- Do you think humans will travel to another planet in your lifetime?

**Presentation** Create a presentation based on your personal feelings of aliens. You can include childhood experiences and ideas that are commonly represented in films.
