

# Colours

**Quotations** "I dyed my hair about 42 different colours, and kids can be pretty judgemental about people who are different. But instead of breaking down and conforming, I stood firm. That is also probably why I was unhappy."  
- Christina Hendricks

"I love the sea's sounds and the way it reflects the sky. The colours that shimmer across its surface are unbelievable. This, combined with the colour of the water over white sand, surprises me every time."  
- John Dyer

- Questions**
- Can colours influence your moods? What colours do you think create particular moods or emotions?
  - Are particular colours mostly feminine or masculine? Why?
  - What colours do you associate with danger, love, creativity, pain and joy?
  - If you dyed your hair, what colour would you choose and why?
  - What colours can you find phone, computers, TV's and kitchen appliances? Why do you think those colours were chosen?
  - Can a person's eye colour change your perception of them?
  - Can you name eight objects in nature which are naturally purple?
  - What colour are your socks? Why did you choose it?
  - What colours in nature symbolise danger?
  - What colours can you attribute to emotions?

**Presentation** Create a presentation on how colours can influence people. Pick a colour and use resources available (Internet and etc) to help you to build a profile of a colour.
